MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX

Volume 52 (1990)

acridine derivatives, splenocytes, Rhodamine 123, cell cycle, flow cytometry, 149
active lipids, natural killer activity, mice, aging, 245
adenylates, energy metabolism, mutant, fungus, mitochondria, 287
β-adrenergic agonist, sexual maturation, prostate, cyclic AMP, 79
β-adrenergic blockade, aging, baroreflexes, blood pressure, cholinergic blockade, heart rate, 179
adrenergic innervation, aging, tibial nerve, vagus nerve, rat, epineurium, perineurium, 195
age-related immune decline, taurine, proliferative response, intracellular free Ca^{2+} concentration, 125
ageing, erythrocytes, glutathione reductase, anaemia, 255
ageing, metabolite transport, membrane vesicles, 263
aging, adrenergic innervation, tibial nerve, vagus nerve, rat, epineurium, perineurium, 195
aging, Alzheimer's disease, isoproterenol, met-enkephalin, carbachol, 277
aging, autoreactive T cells, macrophages, B cells, interleukin-1, immunedefect, 107
aging, baroreflexes, blood pressure, β-adrenergic blockade, cholinergic blockade, heart rate, 179
aging, blood-brain barrier, triiodothyronine transport, 141
aging, bone marrow, thy1, 219
aging, C57BL-6J mice, GnRH, gonadotropins, 207
aging, cardiac lipofuscin, sexual maturation, primates, rabbits, 93
aging, catalytic unit, rat, 169
aging, DNA synthesis, blastogenesis, splenocytes, dietary restriction, 71
aging, K^+, norepinephrine release, heart, 87
aging, monoclonal gammopathies, paraproteinemias, immunosenescence, 235
aging, natural killer activity, active lipids, mice, 245
aging, prolactin, male rat, apomorphine, pituitary, 45
aging, protein turnover, heat shock, *Drosphilia*, 295
aging, small intestine, intestinal injury, 305
Alzheimer's disease, aging, isoproterenol, met-enkephalin, carbachol, 277
anaemia, ageing, erythrocytes, glutathione reductase, 255
apomorphine, aging, prolactin, male rat, pituitary, 45
autoreactive T cells, aging, macrophages, B cells, interleukin-1, immunedefect, 107

baroreflexes, aging, blood pressure, β-adrenergic blockade, cholinergic blockade, heart rate, 179
blastogenesis, DNA synthesis, splenocytes, dietary restriction, aging, 71
blood-brain barrier, triiodothyronine transport, aging, 141
blood pressure, aging, baroreflexes, β-adrenergic blockade, cholinergic blockade, heart rate, 179
bone marrow, aging, thy1, 219
B cells, autoreactive T cells, aging, macrophages, interleukin-1, immunedefect, 107

C57BL-6J mice, aging, GnRH, gonadotropins, 207
carbachol, aging, Alzheimer's disease, isoproterenol, met-enkephalin, 277
cardiac lipofuscin, sexual maturation, aging, primates, rabbits, 93
cardiac muscle, hyperthyroidism, skeletal muscle, DNA, RNA, protein, growth, 1
catalytic unit, aging, rat, 169
cell cycle, splenocytes, Rhodamine 123, acridine derivatives, flow cytometry, 149

chemiluminescence, isoelectric variants, Cu, Zn superoxide dismutase, Mn superoxide dismutase, 11
cholinergic blockade, aging, baroreflexes, blood pressure, β-adrenergic blockade, heart rate, 179
Cu, Zn superoxide dismutase, isoelectric variants, chemiluminescence, Mn superoxide dismutase, 11
cyclic AMP, sexual maturation, prostate, β-adrenergic agonist, 79

dietary restriction, DNA synthesis, blastogenesis, splenocytes, aging, 71
differential hybridization, tissue specific expression, 27
DNA, hyperthyroidism, cardiac muscle, skeletal muscle, RNA, protein, growth, 1
DNA synthesis, blastogenesis, splenocytes, dietary restriction, aging, 71
Drosphilia, protein turnover, heat shock, aging, 295

elastin peptide, signal transduction mechanism, intracellular free Ca^{2+}, inositol phosphates, 61
energy metabolism, mutant, fungus, adenylates, mitochondria, 287
epineurium, aging, adrenergic innervation, tibial nerve, vagus nerve, rat, perineurium, 195
erythrocytes, ageing, glutathione reductase, anaemia, 255

flow cytometry, splenocytes, Rhodamine 123, acridine derivatives, cell cycle, 149
fungus, energy metabolism, mutant, adenylates, mitochondria, 287

glutathione reductase, ageing, erythrocytes, anaemia, 255
GnRH, aging, C57BL-6J mice, gonadotropins, 207
gonadotropins, aging, C57BL-6J mice, GnRH, 207
growth, hyperthyroidism, cardiac muscle, skeletal muscle, DNA, RNA, protein, 1

heart, K^+, norepinephrine release, aging, 87
heart rate, aging, baroreflexes, blood pressure, α-adrenergic blockade, cholinergic blockade, 179
heat shock, protein turnover, aging, *Drosphilia,* 295
hyperthyroidism, cardiac muscle, skeletal muscle, DNA, RNA, protein, growth, 1

immunedefect, autoreactive T cells, aging, macrophages, B cells, interleukin-1, 107
immunosenescence, monoclonal gammopathies, paraproteinemias, aging, 235
inositol phosphates, elastin peptide, signal transduction mechanism, intracellular free Ca^{2+}, 61
interleukin-1, autoreactive T cells, aging, macrophages, B cells, immunedefect, 107
intestinal injury, aging, small intestine, 305
intracellular free Ca^{2+}, elastin peptide, signal transduction mechanism, inositol phosphates, 61
intracellular free Ca^{2+} concentration, taurine, age-related immune decline, proliferative response, 125
isoelectric variants, chemiluminescence, Cu, Zn superoxide dismutase, Mn superoxide dismutase, 11
isoproterenol, aging, Alzheimer's disease, met-enkephalin, carbachol, 277

K^+, norepinephrine release, heart, aging, 87

macrophages, autoreactive T cells, aging, B cells, interleukin-1, immunedefect, 107
male rat, aging, prolactin, apomorphine, pituitary, 45
membrane vesicles, ageing, metabolite transport, 263
met-enkephalin, aging, Alzheimer's disease, isoproterenol, carbachol, 277
metabolite transport, ageing, membrane vesicles, 263
mice, natural killer activity, active lipids, aging, 245
mitochondria, energy metabolism, mutant, fungus, adenylates, 287
Mn superoxide dismutase, isoelectric variants, chemiluminescence, Cu, Zn superoxide dismutase, 11
monoclonal gammopathies, paraproteinemias, aging, immunosenescence, 235
mutant, energy metabolism, fungus, adenylates, mitochondria, 287

natural killer activity, active lipids, mice, aging, 245
norepinephrine release, K^+, heart, aging, 87

paraproteinemias, monoclonal gammopathies, aging, immunosenescence, 235
perineurium, aging, adrenergic innervation, tibial nerve, vagus nerve, rat, epineurium, 195

pituitary, aging, prolactin, male rat, apomorphine, 45
primates, cardiac lipofuscin, sexual maturation, aging, rabbits, 93
prolactin, aging, male rat, apomorphine, pituitary, 45
proliferative response, taurine, age-related immune decline, intracellular free Ca^{2+} concentration, 125
prostate, sexual maturation, cyclic AMP, β-adrenergic agonist, 79
protein, hyperthyroidism, cardiac muscle, skeletal muscle, DNA, RNA, growth, 1
protein turnover, heat shock, aging, *Drosphilia,* 295

rabbits, cardiac lipofuscin, sexual maturation, aging, primates, 93
rat, aging, adrenergic innervation, tibial nerve, vagus nerve, epineurium, perineurium, 195
rat, aging, catalytic unit, 169
Rhodamine 123, splenocytes, acridine derivatives, cell cycle, flow cytometry, 149
RNA, hyperthyroidism, cardiac muscle, skeletal muscle, DNA, protein, growth, 1

sexual maturation, cardiac lipofuscin, aging, primates, rabbits, 93
sexual maturation, prostate, cyclic AMP, β-adrenergic agonist, 79
signal transduction mechanism, elastin peptide, intracellular free Ca^{2+}, inositol phosphates, 61
skeletal muscle, hyperthyroidism, cardiac muscle, DNA, RNA, protein, growth, 1
small intestine, aging, intestinal injury, 305
splenocytes, DNA synthesis, blastogenesis, dietary restriction, aging, 71
splenocytes, Rhodamine 123, acridine derivatives, cell cycle, flow cytometry, 149

taurine, age-related immune decline, proliferative response, intracellular free Ca^{2+} concentration, 125
thy1, aging, bone marrow, 219
tibial nerve, aging, adrenergic innervation, vagus nerve, rat, epineurium, perineurium, 195
tissue specific expression, differential hybridization, 27
triiodothyronine transport, blood-brain barrier, aging, 141

vagus nerve, aging, adrenergic innervation, tibial nerve, rat, epineurium, perineurium, 195
